

Dear Friends,

There will be a very important citywide meeting this Saturday, November 17 at Warren Easton High School on 3019 Canal St. about school facilities in New Orleans. This is a similar process as the UNOP but focusing on school facilities. It is important that we get parents, young adults, and students to attend this meeting so we could voice our concerns about the school facilities in our community. The city will decide on what to do with the school facilities in New Orleans. We will decide what schools we want in our community, what programs we would like to see in our schools and what school buildings need to be closed or demolished and what we would like to see in place of that building, such as do we want to convert it into a community center or a park ...This is a concern for the whole community and not only for parents who send their children to public schools because the quality of education effect the safety and life of a whole community.

Please pass this on to all parents. Interpreting and child care will be provided. Please call (1-877-343-4773) or email Joe Butler ([info@sfmppop.org](mailto:info@sfmppop.org)) with any concern or comment.

Thank you,

Cam
